

EnviroPod™ LittaTrap™

Meet Zero Pellet Loss requirements with LittaTrap™

The EnviroPod LittaTrap™ is a catch basin filter that is a safe and effective method of eliminating pellet loss down stormwater drains.

Designed by international stormwater management company EnviroPod the system is in use by petrochemical, logistics and plastic manufacturers in the USA, Canada, Australia and New Zealand.

Endorsed by the New Zealand Plastic industry and supported by the Canadian and Australian plastic industries, the LittaTrap™ will help you with your Operation Clean Sweep initiatives to achieve Zero Plastic Pellet loss.

EnviroPod is a proud member of

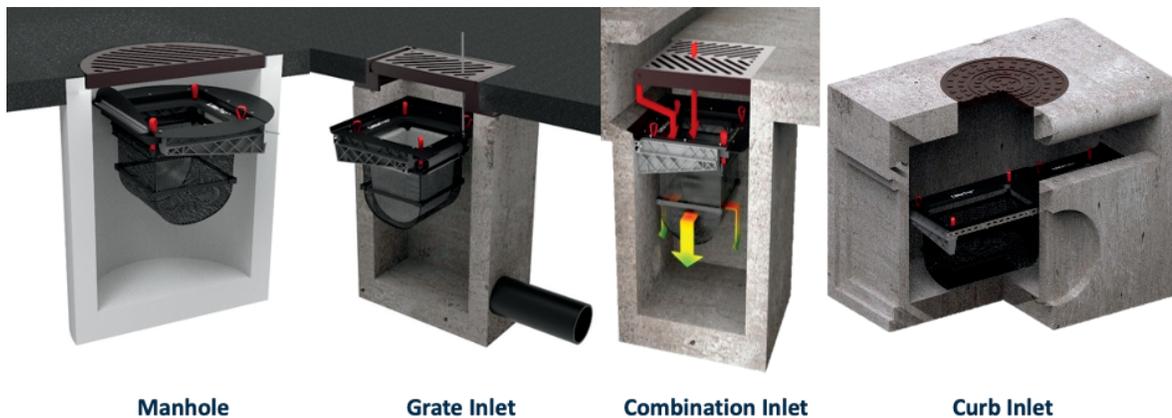

LittaTrap™ will bring your facility closer to Zero Pellet Loss.

Why install a LittaTrap™?

- **Stop plastic pellets leaving your site**
The LittaTrap™ with Pellet Liner captures all particles larger than 1mm, preventing plastic pollution leaving your site in line with Operation Clean Sweep objectives of Zero Resin Pellet Loss.
- **Reduce your costs**
Installing a LittaTrap™ will reduce the risk of blockages further downstream and act as valuable pre-treatment for other stormwater devices.
- **Cost-effective**
The lowest cost method of stormwater treatment on the market.
- **Minimal maintenance costs**
The patented basket technology allows for simple hand maintenance, reducing expensive maintenance costs.
- **Easy to retrofit**
Easily retrofitted into existing catch basin.
- **Hot spot target areas**
Can be used to hot spot target areas of potential plastic loss such as loading zones, manufacturing, and storage areas.

Protect the Future of our Waterways

LittaTrap™ for all stormwater drains

Manhole

Grate Inlet

Combination Inlet

Curb Inlet

A stormwater catch basin with a LittaTrap™ installed will capture and retain 100% of plastic and other debris over 5mm. When coupled with an EnviroPod patented Plastic Pellet Liner, the LittaTrap™ will further capture all plastic particles greater than 1000 microns (1mm), ideal for preventing resin pellet loss.

A hand-maintainable and practical device, the LittaTrap™ is an effective solution to STOP land-based pollutants reaching the marine environment.

LittaTrap™ features

- **Hydraulically designed**
With high flow through capacity to avoid flooding.
- **Flexible design**
To fit all catch basins.
- **Easy install and maintenance**
Light weight and hand maintainable.
- **Strong and Durable**
Supported by a 8 year limited warranty.
- **Capture site-specific pollutants**
EnviroPod performance liners available to capture pellets and powder of all sizes.
- **Meet sustainability goals**
Achieve Zero Pellet Loss.
- **Certified to meet regulations**
California Water Board certified as Full Trash Capture device.
