

# EnviroBasin™ Air

ENVIROPOD.COM

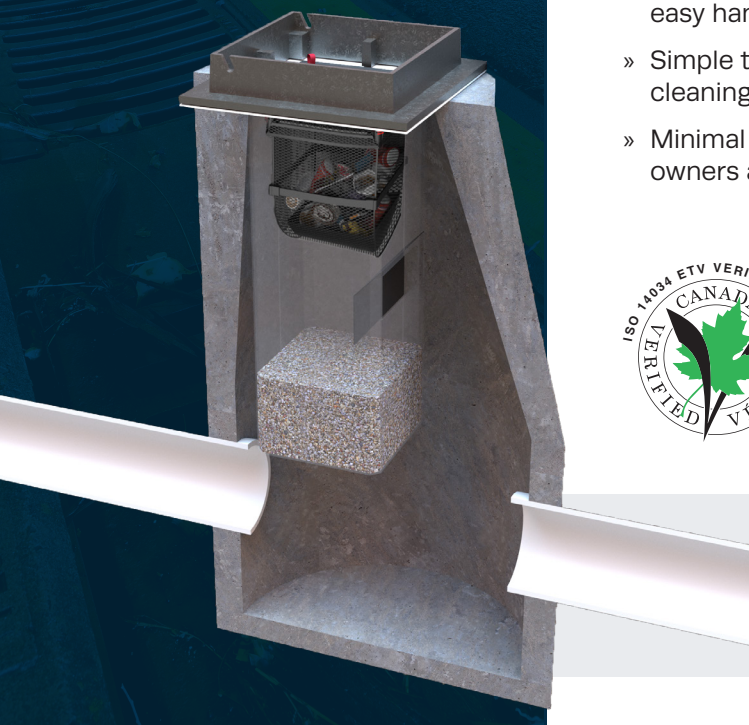

» **STAINLESS STEEL CONSTRUCTION**  
Built for long-term durability

» **SUSPENDED DESIGN**  
Fits within existing manholes or bridge deck chambers

» **FULLY REMOVABLE INSERT**  
Simplifies inspection and maintenance

» **NO STRUCTURAL CHANGES REQUIRED**  
Installs under existing grate frames

» **PROVEN PERFORMANCE**  
Consistent with ISO 14034 ETV-verified results

## THE LATEST CONFIGURATION OF THE PROVEN ENVIROBASIN™ SYSTEM

Purpose-built for catch basin manholes, the EnviroBasin™ Air is a suspended, self-contained Water Quality Inlet designed for through-flow configurations.

### » PURPOSE-BUILT FOR CATCH BASIN MANHOLES

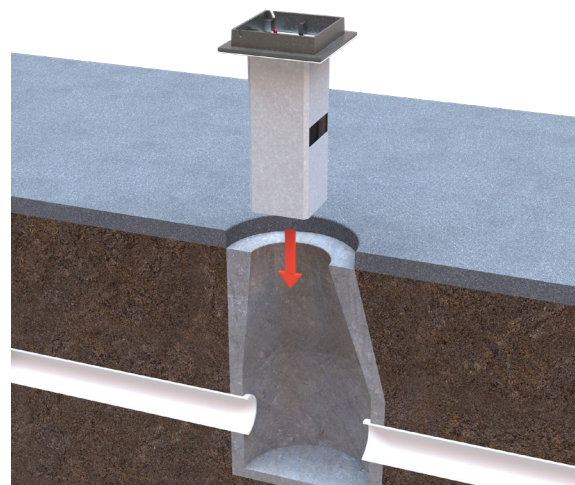

- » Designed for through-flow configurations
- » Enables sediment + trash capture without altering infrastructure
- » Ideal for retrofits, bridge-deck drains, large chambers and constrained sites.

### » INSTALLATION & MAINTENANCE EFFICIENCY

- » Lightweight, modular frame for easy handling
- » Simple to remove for flushing, cleaning, or inspection
- » Minimal downtime for asset owners and operators

### » PERFORMANCE CONSISTENCY

- » Aligned with Canadian ETV testing protocols
- » Captures sediment and trash effectively in high-flow environments
- » Complements existing LID and BMP infrastructure (e.g. ponds, swales, tree cells)
- » Reduces maintenance frequency through built-in pre-settling design
